ENVIRONMENTAL POLICY
homeline.uk.com

Environmental Policy

Homeline Building Products is one of the largest cellular foam extruders in the UK & Ireland, with over 120,000 sq ft of state of the art manufacturing and stock facilities.

Consistently and reliably, we have been supporting and supplying thousands of PVC-U installations each week.

Homeline Building Product Limited, (registered number 6801303) is committed to providing the best quality product and service to all our customers, in accordance with all environmental legislation.

The Environmental Benefits Of Choosing Homeline

- 100 % Recyclable
- Can be reused up to 10 times
- More thermally efficient than timber
- Weather resistant
- Working life of 40 years +
- Does not need painting (no chemicals from paint)
- No repainting or regular repairs to timber
- Low maintenance – saves money
- Does not produce harmful CFCs

It will be decades before you have to consider replacing our Homeline roofline products – that's got to be good news for the environment.

Mission Statement

“To develop Homeline Building Products to be the most innovative, the most customer friendly, and the most environmentally conscious cellular foam manufacturer in the UK & Ireland.”

Reducing Pollution and the Use of Hazardous Materials

Homeline Building Products is committed towards the elimination of lead based stabilisers in all our cellular extrusions, in accordance with guidelines set out by Vinyl 2010 (the European PVC industry commitment to sustainability). Strategic action plans are already in place regarding the use of non-lead based stabilisers across our product portfolio.

Waste Management

Homeline Building Products is actively involved in, and committed to recycling the small proportion of waste that is produced at our manufacturing facility. Any waste produced by our manufacturing facility is separated and sent for specialist recycling. Waste targets have also been set to ensure all our suppliers and indeed staff, don't unnecessarily create waste from their daily activities resulting in an environmentally conscious supply chain.

Transportation

Homeline Building Products actively train and encourage all transport staff regarding the energy efficient use of company vehicles to gain maximum fuel efficiency. To assist this policy, all vehicles are fitted with satellite navigation to facilitate accurate route planning and reduced fuel consumption.

Energy Consumption

Homeline Building Products take every course of action in manufacturing, logistics and the office environment to reduce energy consumption where possible. Advice on how to achieve this is promoted throughout our premises, to actively encourage our staff to participate.

Continual Improvement

Homeline Building Products will continually invest over the next five years towards renewing and upgrading all existing machinery and tooling, to get the best product possible, with the least impact of the environment. Homeline Building Products will also work towards gaining the environmental management system ISO 14001:2004

Policy Management & Implementation

Homeline Building Products take this Environmental Policy and Action Plan extremely seriously, often using it to shape and influence key strategic decision-making within the company. The policy implementation has the full support of the company management at the highest level.
